(a) Hermes
Session notes
LLM edits MEMORY.md (add/patch/remove)
Over 2,200 chars: LLM merges or deletes
(every session)
Previous summary
+ new turns
LLM rewrites the summary
(every compaction)
(b) CEM
Session notes
1. Extract (LLM) entity, attr, scope, value, prev. value
2. Ground drop values not in the source
3. Merge version chain per (entity, attr, scope)
4. Pack fewest chars first
